

SUPPLEMENTAL AMENDMENT  
U.S.S.N. 10/526,120

**Claims Listing**

1. (Original) A recombinant nucleic acid comprising a gene encoding a first signal peptide operably linked to a gene encoding an allergen wherein the first signal peptide mediates the translocation of the allergen into the endoplasmic reticulum.
2. (Original) The nucleic acid of claim 1 which is DNA.
3. (Previously presented) The nucleic acid of claim 1 wherein the first signal peptide is the N-terminal signal peptide of LAMP-1, human tissue plasminogen activator, LAMP-II, DEC-205, P-selectin, tyrosinase, GLUT4, endotubin or Nef protein or a functional equivalent thereof.
4. (Previously presented) The nucleic acid of claim 1 wherein the first signal peptide is the N-terminal signal peptide of LAMP-1 or human tissue plasminogen activator or a functional equivalent thereof.
5. (Currently Amended) The nucleic acid of claim 1 further comprising an operably linked gene encoding a ~~second signal~~ targeting peptide wherein the ~~second signal~~ targeting peptide targets the allergen to an endosome or lysosome.
6. (Currently Amended) The nucleic acid of claim 5 wherein the ~~second signal~~ targeting peptide is the C-terminal lysosome or endosome targeting sequence of LAMP-1, human tissue plasminogen activator, LAMP-II, DEC-205, P-selectin, tyrosinase, GLUT4, endotubin or Nef protein or a functional equivalent thereof.

SUPPLEMENTAL AMENDMENT  
U.S.S.N. 10/526,120

7. (Currently Amended) The nucleic acid of claim 6 wherein the ~~second signal~~ targeting peptide is the transmembrane and cytoplasmic domain of LAMP-1.
8. (Previously presented) The nucleic acid of claim 1 which encodes the allergen Blo t 5, Blo t 1, Der p 1 or Der p 2, Der p 3, Der f1, Der f2, Der f3, a T helper cell epitope thereof, or a antigenic fragment thereof containing one or more T helper cell epitope or a functional equivalent.
9. (Previously presented) The nucleic acid of claim 1 comprising the sequence of SEQ ID NO:2, SEQ ID NO:3, SEQ ID NO:4, SEQ ID NO:5, or SEQ ID NO:6.
10. (Previously presented) The nucleic acid of claim 1 which is a plasmid.
11. (Previously presented) The nucleic acid of claim 1 further comprising an operably linked promoter.
12. (Original) The nucleic acid of claim 11 wherein the promoter is human CMV promoter.
13. (Previously presented) The nucleic acid of claim 11 which is an expression vector.
14. (Original) A vaccine comprising a recombinant nucleic acid according to any one of claims 1 to 13.
15. (Original) A composition comprising a recombinant nucleic acid according to any one of claims 1 to 13 and a pharmaceutically acceptable carrier or diluent.

SUPPLEMENTAL AMENDMENT  
U.S.S.N. 10/526,120

16. (Original) A method for immunization against an allergen comprising administering to a subject in a first phase a recombinant nucleic acid according to any one of claims 1 to 13, and in a second phase administering the allergen to the subject.
17. (Original) The method of claims 16 wherein the allergen is administered in combination with an adjuvant.
18. (Previously presented) The method of claim 16 wherein the nucleic acid is administered in the first phase over a period of time sufficient to induce long term immune memory in the subject.
19. (Original) The method of claim 18 wherein multiple doses of the nucleic acid is administered in the first phase over a period of about a year.
20. (Previously presented) The method of claim 16 comprising administering the allergen to the subject intraperitoneally and subsequently by aerosol.
21. (Previously presented) The method of claim 16 wherein the nucleic acid is administered orally in the first phase.
22. (Original) The method of claim 22 comprising administering chitosan nanoparticles containing the nucleic acid.
23. (Previously presented) The method of claim 16 wherein the nucleic acid is administered by intramuscular or intradermal injection.
24. (Original) A method for immunization against an allergen comprising administering to a subject a nucleic acid comprising an expressible allergen gene in a first phase over a

SUPPLEMENTAL AMENDMENT  
U.S.S.N. 10/526,120

period of about a year so as to induce long term immune memory in the subject; and  
administering the allergen to the subject in a second phase.

25. (Original) A method for treating or preventing an allergic reaction in a subject comprising administering a recombinant nucleic acid according to any one of claims 1 to 13 to the subject.
26. (Previously presented) The method of claim 25 wherein the recombinant nucleic acid is administered orally or by intramuscular or intradermal injection.
27. (Previously presented) The method of claim 25 wherein the allergic reaction is asthma or rhinitis.
28. (Cancelled)
29. (Cancelled)
30. (Cancelled)
31. (Cancelled)
32. (Cancelled)
